TAKE CONTROL OVER JACKPOTS

“All connected devices are visible at one glance and reports are as easy shared as an email.”

GROW AS YOU GO

A Jackpot Controller that changes the game...

Gaming Support Jackpot Controller gives you full control of your jackpot operations. It is feature-rich, scalable, cost-effective and secure.

Gaming Support Jackpot Controller works with practically any slot machine on the market. With our Jackpot Controller and its built in security, you can remotely manage your jackpots, update settings, emphasize jackpot values and trigger special effects...all from the comfort of your iPad.

Combining their individual capabilities, Gaming Support Jackpot Controller delivers distributed processing power, providing the casino with an accessible and expandable high-performance jackpot system.

Its modularity enables you to expand or reduce the size of your operation with ease; From a single machine jackpot to a corporate wide jackpot system over multiple properties, managing hundreds, even thousands, of slot machines without the requirements of a server backbone.

Machined from solid aluminum, the enclosure is lightweight and sturdy. Its small, contemporary design not only has an elegant look, it can also take a punch in operation and requires minimal storage space.

Taking tips from other iPad Apps, the interface is clean and intuitive. Managing your system no longer requires learning various complicated levels and screens. You now have an overview of your settings and data all in the palm of your hands. All connected devices are visible at one glance and reports are as easily shared as an email.

NO SERVER REQUIRED
